Objective

I am a B.Tech Computer Science student specializing in Cybersecurity with experience in deep learning and forensic AI. I have worked on deepfake detection systems and web applications. I aim to build a career as a cybersecurity and AI researcher focusing on digital forensics and secure AI systems.

Projects

FORENSIC-AI: An Intelligent Deepfake Video Detection for Digital Evidence | [Github](#)

- Used Vision Transformer (ViT)–based deep learning architecture with transfer learning to build a deepfake detection system
- Technology used to test: FaceForensics++, Celeb-DF, DFDC datasets; evaluation using AUC, CLLR, HTER
- Achievements/impact: Achieved high cross-dataset generalization (AUC up to ~0.97) and improved forensic reliability through likelihood ratio calibration

Smart Fitness and Exercise Tracker

- Used HTML, CSS, Java (OOP), JavaScript, Next.js, MySQL, JDBC along with IoT devices to build a smart fitness tracking system
- Technology used to test: Hardware-software integration testing using IoT sensors and database validation
- Achievements/impact: Gained experience in IoT integration, real-time data handling, and full-stack system development

Automated Trust Scoring Engine for Zero Trust Access | [Github](#)

- Used MERN Stack (React.js, Node.js, Express.js, MongoDB) along with Python (Flask/FastAPI) to build a microservice-based cybersecurity system implementing Zero Trust Architecture for secure remote access control.
 - Technology used to test: OSQuery, Nmap, Docker, Docker Compose, GitHub Actions (CI/CD), REST APIs
 - Achievements/impact: Implemented a Zero Trust–based access control system that dynamically evaluates device security.
-

Education

B.Tech Computer Science (Cybersecurity), NIIT University

2023 to 2027

CGPA : 6.98

Relevant Modules: Data Structures, Design & Analysis of Algorithms, Object Oriented Programming, Operating Systems, Computer Networks and Data Communication, Database Management Systems, Theory of Computation, Digital Image Processing, Artificial Intelligence, Cryptography, Network Security, Cyber Security, Cloud Computing Concepts, Probability and Random Process.

XII, Aadhunik Public School (CBSE)

2022

X, Montessori Cambridge School (CBSE)

2020

Skills

Programming Languages: Java, JavaScript, Python

Web Development: HTML, CSS, Next.js, React.js

Databases: MySQL, MongoDB

Tools & Technologies: GitHub, JDBC, Arduino, Raspberry Pi, Jenkins

AI/ML: Deep Learning, CNNs, Vision Transformers (ViT), Transfer Learning, Model Evaluation (AUC, CLLR, HTER)

Positions of Responsibility

Secretary, Rangmanch NU

- Managed and coordinated club activities and events
- Led team operations and contributed to event planning and execution

Achievements

- Secured 1st Prize in Theatre Competition at GD Goenka University
- Secured 2nd Prize in Nukkad Natak Competition at Malaviya National Institute of Technology (MNIT), Jaipur
- Secured 2nd Prize in Nukkad Natak Competition at The LNM Institute of Information Technology (LNMIIT), Jaipur
- Secured 2nd Prize in Nukkad Natak Competition at BML Munjal University
